

SENTINEL

Real-time Performance Index Management Software

www.axper.ca

Sentinel software, with Vision II cameras, allows real-time management of performance metrics such as:

- Traffic per zone
- Site or zone occupancy rate
- Average time per zone
- Queue management
- Service delay
- Presence detection
- Other metrics customizable according to user needs

The image displays three views of the Sentinel software interface. The top view is a 2D floor plan of a building with several zones highlighted in green and red. The middle view is a data table showing performance metrics for different zones. The bottom view is a mobile phone displaying the software interface.
